

DOUBLE TIPI

2 large Tipis side by side.

The diagram shows 2 tents side by side with all of the sides down leaving a double tipi opening as the entrance. This particular example shows a DJ, dancefloor, bar and seats 137 guests. This has the top table across the dancefloor which can be easily re-arranged ready for the evenings festivities. With the sides open there is more room for guests, which would be more suitable for summer events.
